Resource Management in Primavera P6 – 106R

What you will learn:

Resource Management in P6 Client-Server provides in-depth resource management training in Primavera's client/server-based solution. Building off skills learned in the basic course Project Management in P6 Client-Server (102), this course covers advanced topics in managing resource allocation, future-period bucket planning, and resource leveling. Extended case studies at the end of each day provide an opportunity to apply new skills and functionality.

COURSE OBJECTIVES:

• Define resource rates

• Assign cost accounts to resource assignments

• Analyze resource usage using Resource Usage Spreadsheet

• Edit resource allocation

• Assign resource lag and duration to resource assignments

• Track manual curves in the project

• Set resource leveling options

• Store past period performance

• Run a resource report

BENEFITS OF PRIMAVERA TO INDIVIDUALS

Increases your job opportunities- Due to worldwide use of Primavera P6 software and demand of its expert users, there is huge number of vacancies available for those who knows the use of Primavera P6 software.

Serves as a differentiating factor in most industries.

Better visibility – everything is included in the program so you can easily see what's going on with a project at any time.

Improved forecasting – having up-to-date information means that you are able to clearly see where there is likely to be overbooked or underutilized resources and you can plan accordingly

Instant access – keeping track of progress with time and resources and getting information whenever you need it.

Quicker access – using only one system which gives you all the information you need means you save time by not having to refer to lots of different tools

Better monitoring – it makes monitoring projects and costs simple by allowing you to track and report on progress instantly

Easier project planning – becoming a proficient Primavera P6 user makes it easier to plan projects, especially large scale or complex ones.
