Consultant Certification Examination fee

N89, 000

SAP Consultants are individuals who work on implementation project to setup SAP for use by a company in line with their modeled process in a department. It is the highest level of SAP career in a particular module. SAP consultant also will cover all end user and super-user functions during training. Consultants choose to work independently (at will) on any project and get paid daily or get a paid job with a company to render support on already implemented SAP.

SAP Consultant will need to take the international Exam at Dexnova Consulting Ltd.

SAP Super-users understand all operational areas in a particular module. They have a good understanding of how all processes integrate within a particular module. They oversee and manage end-users in a department. Super-Users during training get operational insight of all end-user areas and can also function likewise.

End-Users undergo training in a particular role under a module. These are the staff in a company that perform that daily functions on the system with respect to their roles or task. Every department have a number of staff performing different roles, these are end-users.
